Dear Mr. Parsons:

Re: Hazardous Waste Inquiry  
U.S. Steel, Gary Works  
Lake County

This is in reference to your telephone conversation with Mr. George Oliver of this office concerning the disposal of hazardous waste materials at the U.S. Steel, Gary Works, Lake County.

As discussed with you, pollution control waste and wastewater treatment sludge are considered hazardous wastes requiring Stream Pollution Control Board approval prior to disposal in a permitted sanitary landfill. This office has no record of any approved landfill sites on U.S. Steel property.

It is recommended that you contact Mr. Larry Kane of the Division of Water Pollution Control at 317/633-0761 to check the status of deep well injection at the Gary Works in the event this method would be utilized for waste disposal.

We appreciate your inquiry and look forward to working together in the future. Future hazardous waste inquiries can be made to Guinn Doyle, Hazardous Waste Supervisor, at 317/633-0178.

Very truly yours,

David D. Lamm, Chief  
Solid Waste Management Section  
Division of Sanitary Engineering  
317/633-0176
